WHAT LEVEL4 DOES

Two growth engines

Level4 Entertainment provides a trivia fundraising model, and a mature skill-gaming platform which supports direct operations and branded B2B partnerships.

VENTURE 01

Online gaming and white-label partnerships

SkillSports is Level4's skill-based online gaming platform, currently active in Europe and positioned for expanded B2B opportunity. The platform supports web and mobile play, branded partner experiences, commercial flexibility around payments, wallets, and revenue share.

- White-label ready for operators and media partners
- Cross-platform play with payments, KYC, AML, and geofencing support
- Designed for long-term partner-owned customer value

VENTURE 02

Trivia tournaments that raise money

Level4 launches trivia tournaments for nonprofits, foundations, and community organizations. Fans, supporters, and communities play to win. The entry fees generate funds for the cause behind the campaign.

- Built for nonprofit and foundation fundraising
- Feels like events instead of donation asks
- Existing use cases include charity foundations, marathon runners, football clubs, and student organizations

SKILLSPORTS

Live gaming platform with operating depth

SkillSports gives Level4 a second commercial engine: a skill-based gaming platform built for direct player engagement, branded partner launches, and long-term B2B revenue share.

\$650k+

prize money monthly

White-label ready

We launch web and mobile skill-gaming products with a custom brand, design system, and market positioning.

Operational support included

We run hosting, maintenance, payments, geofencing, security, customer support, and ongoing product development.

Commercial flexibility

We integrate with existing gateways or new payment setups and support negotiated revenue-share structures.

Built for broader audiences

Positioning centers on skill-based play rather than traditional casino framing, widening partner marketing possibilities.

B2B OPPORTUNITY

Launch a branded skill-gaming experience faster

SkillSports offers a turnkey or semi-managed launch model. Partners bring the brand, audience, and growth strategy, while the platform provides the game infrastructure and operational backbone.

- Web and mobile deployment
- Wallet and payment flexibility
- Partner-owned customer lifetime value

TRIVIA FUNDRAISING

Fundraisers people actually want to join

Level4's trivia model uses attention, rivalry, and community pride to drive donation momentum. Instead of simply asking supporters to give, organizations invite them into a competitive experience with a clear prize, a live leaderboard, and a cause worth backing.

HOW THE MODEL WORKS

01

Choose the theme and prize

Organizations choose a theme for their audience, and offer a prize, ranging from merchandise and tickets to one-of-one experiences.

02

Promote it to supporters

Fans join with a link or QR code, and pay to compete. The event spreads through social channels, supporter communities, and word of mouth.

03

Engagement raises funds

Entry fees generate revenue, while the live competition format makes the experience social, sharable, and repeatable.

Supporter energy

People participate because it feels fun, social, and competitive.

Flexible audiences

Use cases already span charities, athletic clubs, and fan communities.

Simple rollout

Teams promote tournaments through existing club, chapter, or foundation channels.

Clear outcome

Organizers get a fresh fundraising tool with a measurable participation loop.

FUNDRAISING FIT

Charities, clubs, and fans love it

The trivia fundraising model is flexible across causes, audiences, and markets. With community pride and friendly competition, any organization can host a successful tournament.

WHY LEVEL4

Beyond the products

Level4's advantage is the ability to connect audience motivation with structured, skill-based play across multiple business models.

Impact plus entertainment

One side of the business helps organizations fund real-world causes; the other monetizes digital engagement at platform scale.

Consumer and B2B versatility

Level4 works with foundations and fan communities while also supporting operators, publishers, and commercial partners.

Reusable engagement mechanics

Competition, leaderboard pressure, and prize motivation appear across both ventures in different forms.

Room to expand

The model extends across causes, audiences, and markets without losing its core competitive appeal.

LET'S TALK

For foundations, clubs, and strategic partners

If you want a fundraising concept, a branded skill-gaming product, or a deeper partnership discussion, we start from the audience and build the right model around it.

- Fundraising partnerships and launch pilots
- SkillSports white-label and commercial discussions
- Strategic introductions and B2B opportunities
